They are bound to keep you and the cats in your care purring in contentment.

KENNEL

SOLUTIONS PTY LTD

Finally, an Enclosure Purrfect for Cats!

The last thing a cat wants is to be treated like a dog. That's why we created the Raintree Cat Condo.

Our **Raintree™ Cat Condos** are a beautiful addition to any room, and their attractive finish guarantees the facilities will look first class for your clients!

Our **unique** optional exhaust system integrated into each cat condo will guarantee you a pleasant and odour free environment for your staff and customers.

We have provided a separate section for the litter tray (shielding the litter tray from view) – away from the accommodation area, making them extremely **easy to clean and empty**, and *'more comfortable for cats in your care'*.

Hospital grade melamine and the latest technology in superheated glue keeps the condos moisture and bacteria free.

We have created flexible configurations, giving you greater control to meet *your* specific needs.

No down time from your business as they are shipped to you in modules, making assembly easy.
