

# FRP Sani-Kennel™ Isolation Kennel

# KENNEL SOLUTIONS PTY LTD

## The FRP Sani-Kennel Advantage

- Combines upscale appearance with quality, safety and value.
- FRP panels will never warp or rot!
- Washes clean in seconds.
- Easy to install and maintain.

### 18 Decorator Colours

## Attractive & Affordable!

Premium looks don't need to come with a premium price tag. Made with Fibreglass Reinforced Plastic (FRP) panels and available in 18 decorator colours, Mason's exclusive FRP Sani-Kennels look better, work better and last longer than kennels costing hundreds more per run. In fact, FRP is so tough, it's the same material that's commonly used in public restrooms and livestock confinement buildings!

With FRP Sani-Kennels, you'll never have to worry about leakage or cross contamination. Durable, scratch resistant FRP isolation panels fit into our patented, water-tight **Sani-Slope™ aluminium floor mounting system**. The panel's upper section is made of a strong polyethylene grid or chainlink. Dogs are unable to bite through the tough upper grid, but air flows easily between kennels for quick drying.

Able to accommodate either front-sloped or rear-sloped drainage systems, FRP Sani-Kennels can be fitted with Mason's stainless steel gates or our standard chainlink swing gates or stall fronts. Optional swing-up rest benches available.
